These dates are coordinated with other USFWS research activities scheduled on other parts of Desecheo Island as well as scheduling USFWS security personnel for the camp.

The 15-man team will assemble in Puerto Rico on February 8, 2009, for mandatory UXO training. The next three days will include team operations training, and last minute preparation and staging of the several tons of equipment for transport. On February 12th, landing will commence and two stations will be immediately activated. Likewise, stations will continue to operate until the final moments before departure on February 26th.

Halfway through the operation, on February 19th, approximately half of the operating team will be replaced with fresh operators for the final week.

POSSIBLE PIRATE

Ken, G4RWD (ex-ZF1WD), reports that the a "ZF1WD has been spotted on the DXCluster recently with QSL information stated as 'via G4RWD', which is incorrect. Whilst I have operated several times in the past as ZF1WD, I have not been there since 2002, neither did I keep the license up to date due to the cost involved. I can only assume that the callsign ZF1WD has either been re-issued by the Cayman licensing authorities, or that this is a pirate operation. I can't find any reference to this current ZF1WD operation, so I assume the latter."

QSL INFO AND NEWS

QSL Routes. Johannes, DK8JB, reports that an interesting link to visit for QSL routes that date back to 1987 is:

http://f6gcp.free.fr/Base/

DO YOU HAVE THE CORRECT ROUTE? George, K6GT, Northern California Contest Club's (NCCC) QSL Manager/Station Trustee for the club's callsign K6ZM, informs OPDX that he has been receiving several QSL requests for cards for **8P9AG**. The original holder of K6ZM, Phil Frazier, passed away in 1991, and he had used the 8P9AG callsign on a trip to 8P-land in the '80's. Clearly, since his key has been silent since 1991, he has not had any 8P operations since then. Apparently, Andy, DL9USA, was reissued the callsign and was active at the end of 2007. QSLs for that operation should go to DL9USA at: Andreas Glaeser, PF 100 246, 03122 Spremberg, Germany.

DID YOU WORK **KP4AO** on November 23rd? Special event station KP4AO was activated by the A.R.C. Arecibo Observatory. Activity was to celebrate 45 years of operations at the Arecibo Observatory Radio Telescope. For every QSL received, a certificate will be issued. It would be desired for a #10 BUSINESS SIZE SASE to be included with your QSL.

The log for **VU4MY** is now available online at:
